

COVID-19 Ongoing Outbreaks in Congregate Living Settings: Updated April 27, 2020

Introduction

In order to standardize reporting regarding COVID-19 outbreaks in congregate living settings, the NC Department of Health and Human Services will update this report two times per week on COVID-19 outbreaks in congregate living settings that will include the names of facilities where there is an ongoing outbreak and the number of positive COVID-19 cases at the facility related to that outbreak. As this pandemic continues to evolve, we continually reassess the appropriateness of data reporting to balance transparency, public health and individual privacy.

In a congregate living setting, a COVID-19 outbreak is defined as two or more laboratory-confirmed cases in persons who did not have COVID-19 diagnosed before arrival at the facility. An outbreak is considered over after 28 days have passed since the date of symptom onset of the last case. In situations where all persons in a congregate living setting test positive for COVID-19, the outbreak will be considered over when all persons have recovered or been released from isolation.

These data reflect information that has been entered into the North Carolina Electronic Disease Surveillance System (NC EDSS). COVID-19 case and outbreak investigations are conducted by local health departments. Time is required to determine whether a given COVID-19 case is associated with a congregate living facility, gather follow-up information, and enter it into NC EDSS. Thus, data included in this report may differ from data available through media and other sources. Data are preliminary, and these numbers are subject to change as more information is obtained during outbreak investigations.

Beginning May 1, 2020, these data will be updated on Tuesday and Friday by 4 p.m. Numbers of cases and deaths reflect both staff and residents.
